## Individual Parts

### Regarding Genuine and Functional Parts

#### **WARNING**

To avoid component malfunction, serious injury, and property damage, observe the following rules:

1. Use only genuine DJI parts or parts certified by DJI. Unauthorized parts or parts from non-DJI certified manufacturers may cause system malfunctions and compromise safety.
2. Make sure there are no foreign objects inside of the product or its components, such as oil, sand, or water.
3. Make sure the robot and its components are all in good working order, damage-free, and functioning properly. Components include, but are not limited to, the intelligent controller, chassis, and Intelligent Battery.
4. DO NOT disassemble the parts that have been installed before delivery. Unauthorized disassembly may cause malfunctions and affect the functionality and safety of the product.
5. Follow the assembly instructions for cable connection and wiring to avoid cable damage. DO NOT forcibly pull the cables when plugging and unplugging them. Otherwise, the cable connectors may be damaged.

### Chassis and Mecanum Wheels

#### **WARNING**

To avoid component malfunction, serious injury, and property damage, observe the following rules:

1. If the Mecanum wheels or chassis are moving at a high speed, they could potentially cause injury or property damage. Make sure to pay attention when the robot is moving at a high speed.
2. Select a wide space when controlling the robot to move at a high speed. Avoid crashing into any hard objects or walls at a high speed.
3. DO NOT use excessive force when tightening the screws during assembly and disassembly. The thread-locking fluid on the screws is intended for one-time use. For repeated assembly and disassembly, thread-locking fluid is required.
4. It is recommended to use the robot on flat surfaces such as wooden floors, cement, or carpets. Uneven surfaces such as sand may damage the Mecanum wheels or motors. DO NOT use the robot on wet ground or outdoors in rainy or snowy environments.

### **NOTICE**

1. Make sure the motion controller is properly installed before use and the screws on the chassis rear cover are tightened. Otherwise, the motion controller may become loose, which may affect the movement of the robot.

## **Servo**

### **NOTICE**

1. When in use, DO NOT touch the servo to avoid injury.
2. DO NOT hit the servo or the connected parts. Otherwise, it may reduce the service life of the servo or even lead to permanent damage.
3. When the servo overload warning prompts appear in the app multiple times, stop the operation immediately and check the operation and the structure of the robotic arm or servo.

## **Robotic Arm**

### **⚠ WARNING**

1. DO NOT touch the Robotic Arm while it is in use. Otherwise, users may injure their fingers. DO NOT use the Robotic Arm to lift or move the robot.
2. DO NOT hit or suddenly pull the Robotic Arm. Otherwise, the Robotic Arm will impact and damage the servo.
3. Clean foreign objects like droplets in a timely manner. Otherwise, the surface of the structure may corrode.

## **Intelligent Battery**

### **⚠ WARNING**

To avoid fire, serious injury, and property damage, observe the following safety guidelines when using, charging, or disposing of a battery.

### **Battery Use**

1. DO NOT allow the batteries to come into contact with any kind of liquid. DO NOT leave the batteries out in the rain or near a source of moisture. DO NOT drop the battery into water. If the inside of the battery comes into contact with water, chemical decomposition may occur, potentially resulting in the battery catching on fire, and may even lead to an explosion.
2. If the battery falls into water, put it in a safe and open area or explosion-proof container immediately. Make sure to keep it away from flammable materials. Maintain a safe distance from the battery until it is completely dry. DO NOT use the battery again, and dispose of the battery properly as described in the related section below.
3. Put out battery fires using water, sand, fire blankets, or dry powder fire extinguishers.
4. DO NOT use non-DJI batteries. Go to [www.dji.com](http://www.dji.com) to purchase new batteries. DJI takes no responsibility for any damage caused by non-DJI batteries.

5. DO NOT use or charge, leaky, or damaged batteries. If your batteries are abnormal, for example by emitting odor, having a temperature exceeding 75° C (167° F), or appearing misshapen or discolored, contact DJI or a DJI authorized dealer for further assistance.
6. The battery should be used in temperatures from -10° to 40° C (14° to 104° F). Use of the battery in environments above 50° C (122° F) can lead to a fire or explosion. Use of the battery below -10° C (14° F) can lead to permanent damage.
7. DO NOT use the battery in strong electrostatic or electromagnetic environments. Otherwise, the battery's protective board will malfunction.
8. DO NOT disassemble or pierce the battery in any way. Otherwise, electrolyte leakage can lead to a fire or explosion.
9. DO NOT drop or strike the batteries. DO NOT place heavy objects on the batteries or charger. DO NOT use the battery if it is dropped or receives a heavy impact.
10. Electrolytes in the battery are highly corrosive. If any electrolytes make contact with your skin or eyes, immediately wash the affected area with fresh running water for at least 15 minutes, and then see a doctor immediately.
11. DO NOT heat the battery.
12. DO NOT put the loose cells in a pocket, bag, or drawer where they may short-circuit against other items or where the battery terminals could be pressed against each other. DO NOT manually short-circuit the battery.
13. Clean battery terminals with a clean, dry cloth. Dirty terminals may cause poor contact, leading to energy loss or charging failure.

## Battery Charging

1. Only use a DJI approved charger. DJI takes no responsibility if the battery is charged using a non-DJI charger.
2. DO NOT leave the battery unattended during charging. DO NOT charge the battery near flammable materials or on flammable surfaces such as carpet or wood.
3. DO NOT charge the battery immediately after use. Wait until it cools down to near room temperature. Charging the battery outside of the temperature range of 5° to 40° C (41° to 104° F) may lead to leakage, overheating, or battery damage.
4. Disconnect the charger when not in use. Examine the charger regularly for damage to the cord, plug, enclosure, or other parts. DO NOT clean the charger with denatured alcohol or other flammable solvents. DO NOT use a damaged charger.

## Battery Storage, Transportation and Disposal

1. Dispose of the battery in specific recycling boxes only after a complete discharge. DO NOT place the battery in regular trash containers. Strictly follow your local regulations regarding the disposal and recycling of batteries.

### **NOTICE**

#### Use

1. Charge the battery to bring it out of hibernation before using for the first time.
2. Make sure the batteries are fully charged before using.

## Charging

1. Make sure to turn off the battery before charging to avoid power port damage. Make sure the battery level is 95% or lower before charging. If the battery level is higher than 95%, discharge the battery until the battery level is 95% or lower. Otherwise, the battery will not charge.
2. The battery is designed to stop charging when it is fully charged. However, it is good practice to monitor the charging progress and disconnect the battery when fully charged.

## Disposal

1. If the battery is disabled and the battery cannot be fully discharged, contact a professional battery disposal or recycling agent for further assistance.
2. If the battery cannot be powered on after over-discharging, dispose of the battery.

## Motors

### **WARNING**

To avoid component malfunction, serious injury, and property damage, observe the following rules:

1. Make sure that the motors are securely mounted and rotating smoothly before powering on.
2. DO NOT attempt to modify the structure of the motors.
3. DO NOT touch or let your hands come into contact with the motors, motor mounting plates, or inside of the Mecanum wheel immediately after powering off the robot.

### **NOTICE**

1. Make sure there are no foreign objects inside of the motors.
2. Make sure the connections between all the motors and the motion controller are stable.
3. If the motor cannot rotate freely, immediately power it off and check.

## Armor

### **NOTICE**

1. Make sure that all the armor is securely mounted, all cables are firmly connected to the motion controller, and that they are functioning properly.

## Camera

### **NOTICE**

1. DO NOT expose the camera to liquids or immerse in water.
2. DO NOT store the camera in a humid place.
3. DO NOT touch the lens.
4. Clean the lens regularly to avoid blurring or halos. Use a special lens cleaner to make sure that there is no foreign matter on the lens after cleaning and that it does not damage the lens.

## Intelligent Controller

### NOTICE

1. Make sure that all the cables are connected and all connected parts work properly before use.
2. Make sure that the antennas on the intelligent controller are unfolded and adjusted to the proper position for optimal communication.
3. If the intelligent controller antenna is damaged, the performance of the robot will be affected. Contact DJI if the antenna is damaged.
4. DO NOT pull the antenna.

## RoboMaster App

### NOTICE

1. It is recommended to use the latest version of the app.
2. Make sure that the device is fully charged before launching the app.
3. Before using the app with cellular mobile data, contact your mobile device data provider for the latest data information.
4. Read all safety tip prompts, warning messages, and disclaimers carefully. Familiarize yourself with the related regulations in your area. You are solely responsible for being aware of all relevant regulations and operating in a way that is compliant.
5. Your use of the app is subject to the RoboMaster app Terms of Use and DJI Privacy Policy. Read them carefully in the app.

## Product Care

### Storage and Transportation

#### WARNING

To avoid component malfunction, serious injury, and property damage, observe the following rules:

1. Keep batteries, cables, and small parts out of the reach of children and animals.
2. DO NOT leave the battery near heat sources such as a furnace or heater. DO NOT leave the batteries inside of a vehicle on hot days. Never store the battery in environments with a temperature higher than 60° C (140° F). The ideal storage temperature is 22° to 28° C (72° to 82° F).
3. Keep the battery dry.
4. Keep the battery away from objects with metal components such as glasses, watches, jewelry, and hairpins.
5. Never transport a damaged battery.
6. Before carrying the Intelligent Battery on an airplane, it must first be discharged until the battery level is lower than 30%. Only discharge the battery in a fireproof location. Store Intelligent Batteries in a ventilated location.

### **NOTICE**

1. Secure the Mecanum wheels before transportation.
2. When stored for an extended period, make sure to attach the chassis rear cover firmly to prevent the ports on the motion controller from being exposed. Otherwise, it may become moist and corroded, which affects the service life.
3. Make sure to remove the battery from the robot and store it when the device is not in use for an extended period. Refer to the Intelligent Battery section for more information on how to store the battery.
4. Discharge the battery to 40-60% if it will not be used for 10 days or more. This can significantly extend the battery life. The battery automatically discharges to below 60% when it is idle for more than 10 days. It takes approximately one day to discharge the battery to 60%. It is normal to feel moderate heat emitting from the battery during the discharge process.
5. DO NOT store the battery for an extended period with its power fully discharged. Otherwise, it may lead to irreversible damage.
6. The battery will enter hibernation mode if it is depleted and stored for an extended period. Recharge the battery to bring it out of hibernation. During hibernation, the battery cannot be turned on and the battery level cannot be checked.

## **Maintenance**

To avoid component malfunction, serious injury, and property damage,

### **⚠ WARNING**

observe the following rule:

1. DO NOT use the battery when the temperature is too high or too low.

### **NOTICE**

1. DO NOT over-charge or over-discharge, as this may lead to battery cell damage.
2. If the battery is not used for an extended period, the service life may be reduced.
3. Discharge and charge the battery completely once every three months to keep it in optimal condition.
4. After being used for an extended period, the grease between the Mecanum wheel rollers and the hubs will start to run out, which will lead to the wheels making a screeching sound during use. Regularly check if more grease is required. Otherwise, the wheels may be damaged.
5. After the robot has been stored for an extended period or the motion controller has been reinstalled, calibrate the robot in the RoboMaster app before use. Otherwise, the movement of the robot may be affected.
6. Check every part of the robot after any crash or impact. If you have any problems or questions, contact a DJI authorized dealer.

## Compliance with Regulations & Operation Limits

### **WARNING**

1. Make sure you understand and comply with the local laws and regulations and, if required, have obtained corresponding approval and clearance from the related government agencies before use.
2. Respect the privacy of others when using the image capture, sound recording, and video recording functions. **DO NOT** conduct surveillance operations such as image capture, sound recording, or video recording on any person, entity, event, performance, exhibition, or property without authorization or where there is an expectation of privacy, even if the image or video captured or the sound recorded was for personal use.
